Concrete processing

Sprayable elastomeric coatings for specific surface optimization when producing, storing and transporting concrete.

Minimizes sticking, simplifies cleaning, reduces noise and is extremely impact and wear-resistant

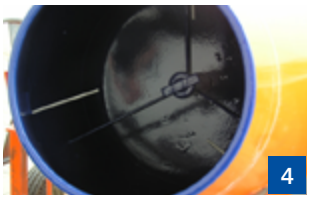

Fields of application:

- **Concrete molds (release oil reduction)**
- **Transport troughs (cleaning reduction)**
- **Gutters / buckets**
- **Troughs / chutes**
- **Mixers (stationary / truck mixer)**

with Video example

1 Elastomers offer optimum protection in impact situations
2 Improves wear-resistance and cleaning, reduces noiset
3 A typical area of application for MetaLine – seamless, soft and wear-resistan
4 The mother of concrete processing – protected with MetaLine
5 Ensures complete sliding, helps to reduce cleaning time
6 MetaLine is at home in almost any wet mixing processes
7 Impressively easy and fast cleaning of a concrete trough

REFERENCES

Concrete molds

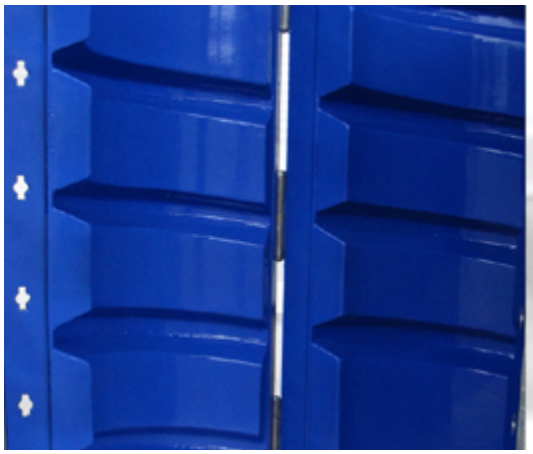

Extremely smooth elastomeric coatings with excellent mold release properties – in order to obtain perfect surface qualities. Wear resistant, precise in its shape and fully corrosion resistant.

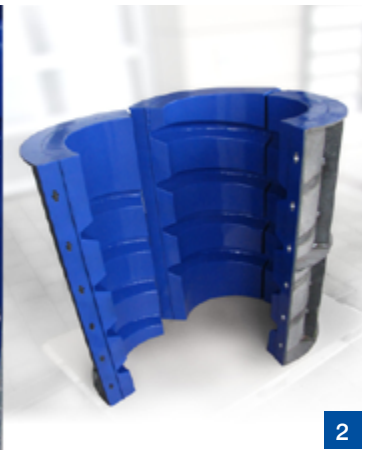

The optical value of natural stone surfaces or graphical elements can be duplicated.

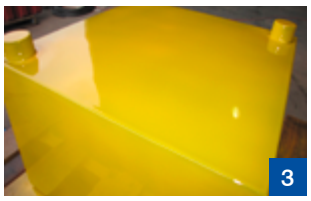

1

Fields of application:

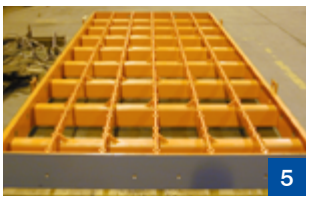

- molds
- formworks
- sculptures
- surface decorations
- logos / graphical elements

1. Easy to clean and ready to use again immediately after de-molding – simply MetaLine!
2. Special concrete mold consisting out of 3 parts – MetaLine is strong in duplicating finest details
3. Coated mold to create a cavity – for a modular bridge construction concept
4. Resistant to release agent and durable against harsh outdoor conditions – even natural brick surfaces could be duplicated
5. Particularly with complex geometries, MetaLine brings its unique product characteristics into play
6. Construction elements like bricks can be produced faster and more accurately by use of MetaLine coated molds ...
7. No coating will last forever – however MetaLine will last definitely longer than other products
