Tribofinishing Equipment

MetaLine® Series 700 – **Repair compounds for liners in in mass finishing equipment**

Repair compounds to be applied by troweling, pouring or spraying. To refurbish worn linings or to install a completely new inlay without having to remove the existing one.

Suitable for wet and dry operating machines. Excellent adhesion to steel or rubber and polyurethane inlays.

Applications

- circular vibrators
- discharge panels and screens
- cutlery polishing machines
- trough vibrators
- deburring systems
- wheel rim polishing machines

Reference

- just as wear-resistant as original PUR linings or rubber coatings
- local repairs can be performed in the installed (but drained) state
- the existing coating must NOT suffer by hydrolysis as no bonding would be realized
