

Blasting technology

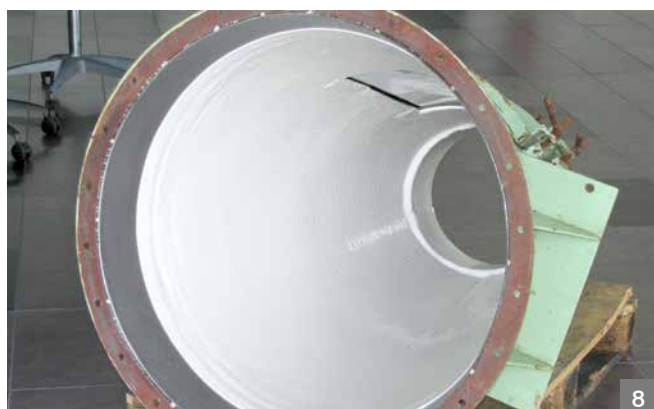

MetaLine® Series 700 – **Wear protective coatings in mechanical surface finishing**

Elastomeric coatings applicable by spraying or troweling to repair existing rubber linings and to recoat wear-impinged components.

Extremely impact resistant and durable.

Applications

- grit blasting cabinets (dry / wet / medical)
- blasting baskets
- cyclones / blasting grit recycling
- rotating tables
- blasting templates
- component fixtures
- blasting jigs

Reference

- can be applied in any required layer thickness starting from 1 mm (40 mils)
- metal-free for special blasting systems in aircraft maintenance or medical technology (FDA-compliant)
- self-processable
