

Biogas Systems

MetaLine® Series 700 – **Chemical & mechanical protection for fermentation processes**

Seamlessly sprayable elastomeric coatings for the lifetime extension – good chemical resistance, non-stick properties & easy to clean. Repairable. Ultra wear resistant and permanently resistant against sludge, biocomponents and waste water.

Applications

- mechanical loaders
- screw conveyors
- silos / composting plants
- fermenters
- conveyor troughs
- push floor containers
- paddle agitators

Reference

- chemically resistant in a pH range from 3 to 11
- maximum duplex corrosion protection including a massive mechanical encapsulation
- bonds very well to stainless steel and many metal alloys
