

Screens / Filters

MetaLine® Serie 700 – Wear resistant coatings for mineral processing

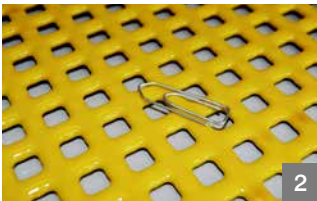

Castable and sprayable elastomeric coatings for the service life extension or repair of screen structures. Can be applied evenly and precisely. Dimensionally stable, fast setting & highly wear resistant.

Applications

- screen coatings (non-metallic-character)
- drum screens
- food washing appliances
- perforated plate constructions
- vibratory screens
- screen cleaners
- paddle mill revolving scrubbers
