

Agitators / Mixers

MetaLine® Series 700 – Coatings for abrasive mixing and aeration processes

Sprayable elastomeric protective coatings reducing wear and tear. Optionally available with non-stick properties. Easy to clean.

Can be used in temperatures from -50 °C (-58 °F) up to +80 °C (176 °F). Conform to pharmaceutical and food grade specifications in accordance with FDA 177.1680 (title 21).

Applications

- blade mixers
- horizontal mixers
- precipitators
- planetary mixers
- kneading inserts
- screw mixers

Reference

- resistant to bio-substances and fouling processes in wastewater treatment
- does not tend to cake or stick due to its high elasticity
- for mixing processes up to a maximum flow velocity of 50 m/s (**165 ft/s**)
